General Information

Short summary

A Cypriot company which manufactures and distributes quality packing products to the pharmaceutical, veterinary, cosmetic and food industry is looking for potential companies (i.e., importers, distributors, copackers) under commercial, supplier and outsourcing agreement to supply their products to take inventory in bulk and to either deliver to other companies or for their own purposes.

Full description

A Cypriot company, which was established in 1991, is specializing in the development and supply of plastic packaging products. The company is also producing plastics extrusion (soft and rigid), extrusion blow moulding and injection moulding.

Company’s product portfolio focuses on several polypropylene and polyethylene terephthalate materials (PP/PE/HDPE/PS/PET) that are highly used by the pharmaceutical, veterinary, cosmetic and food industries.

The company offers also custom-made solutions for any kind of its products.

Their products are designed to improve functionality, increase productivity, and allow energy savings. Their lines are

of
the latest technologies on the market, guaranteeing customers a better quality of products. They carry strict quality controls to comply with measurements and standards of the product. The company is accredited with
the certification of Quality Management System ISO-9001 and FSSC 22000 (Food Safety System Certification).

The company also sets particular emphasis on the continuous improvement of its products, services and processes, and for this reason it participates in various international exhibitions to be up to date with the latest developments and market trends.

Company's workforce has specialized know-how, training, and experience for the manufacture and supply of plastic packaging products.

Also, the company attaches great importance to stable and long-term cooperation with its partners and customers.

Advantages and innovations

Company’s product lines are of the latest technology on the market, guaranteeing customers a better quality of products. They carry strict quality controls to comply with the measurements and standards of the products.

For all their products, they can provide custom moulds solution according to the customers’ design and request.

Their products are eco-friendly designed to reduce damage to the environment. .

Company’s upscale equipment and capacity bring the most challenging custom mould projects to the market development.

The company is certified with the Quality Management System ISO-9001, FSSC 22000 (Food Safety System Certification).

Company's workforce has specialized know-how and experience for the manufacture and supply of plastic packaging products to carry out complex tasks and provide technical support to potential partners.
