General Information

Short summary

French company is looking competitive industrial partners in backpacking process. They are aiming for a short-term manufacturing collaboration with companies from the Baltics States and Eastern Europe.

Full description

For the future, the company plans to expand global range through accessories with new functionalities and new users experiences. The innovative backpack project represent the first product of the story adapted to the futurs customers needs and more responsible consumption needs.

The Innovative Backpack helps correct posture for each age and each morphology. An innovative 2-in-1 principle allows to carry comfortably a weight and a variable storage volume on backs, while guaranteeing an optimal postural balance. The exclusive patented system with additional shoulder straps invite the user, through a comfortable and adjustable clamping set, to naturally position shoulders towards the back to achieve a perfect alignment of the upper body.

They are now looking for a reliable manufacturers of backpack Process. The manufacturers could either deliver the complete from the master sample prototype to the final products including all the components. The product should be make out of recycled or recyclable components. (Textile / accessories / webbings). The aim of the project is to engage an ecodesign approach can help reduce the associated environmental and social impacts.

The SME is looking for established manufacturers with experience of producing technical backpack process.

Selected manufacturers can expect a long term cooperation, for this they want to establish a manufacturing agreement. Manufacturers based in Baltic states and Eastern Europe are prioritized.
