## General Information

### Short summary

Our client is a Canadian IT company that is seeking partners with which to develop 3D thermal modelling technology. This technology would be based on drone imagery captured using thermal optics. Our client is seeking technology development partners and building facilities for demonstration and proof of concept purposes with whom they can establish a commercial agreement.

### Full description

Our client uses drone technology and photogrammetry software to develop high-resolution thermal imagery and 3D models of buildings. This imagery and subsequent models are used to examine energy efficiency analysis, building operations, and property management. Their energy efficiency analysis is offered as a service to owners and managers of residential, commercial, and industrial buildings.

Our client is seeking technology development partners and building facilities for demonstration and proof of concept purposes with whom they can establish a commercial agreement.

#### Advantages and innovations

An advantage of this technology is that it combines advanced thermal optics with advanced photogrammetry software to analyze the energy efficiency of building stock.

Additionally, they are proposing as part of this technology partnership to develop a public mapping application which combines building data with the company's thermal imagery visualization product.

#### Technical specification or expertise sought

The company is seeking partners in technology development, building and facility operators, and energy utilities. Additionally, our client would be interested in partnering with energy efficiency implementors and manufacturers of insulation products for buildings.

#### Stage of development

**Concept stage**

#### Sustainable Development goals

- **Goal 11: Sustainable Cities and Communities**
- **Goal 17: Partnerships to achieve the Goal**
- **Goal 7: Affordable and Clean Energy**
- **Goal 13: Climate Action**

#### IPR Status

**Secret know-how**

## Partner Sought

#### Expected role of the partner

The company is seeking partners in technology development, building and facility operators, and energy utilities. Additionally, our client would be interested in partnering with energy efficiency implementors and manufacturers of insulation products for buildings.

#### Type of partnership

**Commercial agreement**

#### Type and size of the partner

- **SME <=10**

## Dissemination
