## General Information

### Short summary

A UK company has designed and developed a modular desk organiser that can be adapted to each person's needs. By using the vertical space above the desk or small workspace, the organiser leaves it clutter free, leaving more room for papers, laptop, PC, monitor and/or other devices.

They are seeking a wooden products manufacturer, who uses sustainably sourced wood, to produce high-quality finished wood prototypes and products.

### Full description

Include background information about the SME, more detail about the product/service/technology on offer or required and the type(s) of cooperation sought. Remember to include an explanation of the desired outcome of the international partnership and how your client envisages it working

Young designer who understands the challenges of working at multiple locations anywhere, be it, home, 'hot desking' in offices, business workspaces, universities etc... has developed a new desktop organiser  
It provides an alternative to the traditional desk tidy, and it can hold all the necessary desk equipment, such as pens, pencils, paperclips, mobile phone, stapler, headphones/ear pods and more.

It's portable and can be put together in seconds through its patent pending design, ease of changing the different modules, bases, and stem.  
It is a stress-free and tool-free product to assemble. Plus, there is the unique ability to personalise and customise it.

The key benefits of this new organiser and its modules allow you to make use of the unused vertical space above your desk, rather than taking up a large horizontal footprint, leaving you with more space for your papers, laptop, PC, monitor and/or other devices.

The company is seeking manufacturers of high-quality small wood products, who use sustainably sourced wood, that can produce prototypes and finished products in small and large batch production runs. Initially 10's and then 100's.

#### Limit

##### Advantages and innovations

The organiser is portable, easy to assemble, customisable using different modules, and uses the vertical height above the desk or workspace to leave more space for papers, your laptop and/or other devices.

##### Technical specification or expertise sought

Manufacturers of high-quality small wood products who use sustainably sourced wood, that can produce prototypes and finished products in small and large batch production runs. Initially 10's and then 100's

##### Stage of development

**Available for demonstration**

##### Sustainable Development goals

• **Goal 13: Climate Action**

##### IPR Status

**IPR applied but not yet granted**

## Partner Sought

##### Expected role of the partner

To provide fully costed quotes and delivery times to produce prototypes and products in advance of orders being place.  
To demonstrate and provide evidence of the sourcing of (country of source) sustainably sourced wood and any actions or policies in place to leave the environment more advantaged. E.g., Planted five new trees for every tree cut down and sound forestry to manage them.  
To manufacture and supply high-quality finished wooden prototypes or products

##### Type of partnership

##### Type and size of the partner

### Supplier agreement

- SME 50 - 249
- SME 11-49
