General Information

Short summary

Spanish association, established for the representation, promotion and defense of entrepreneurs and business interests in the field of the canned sector is interested in participating, as a partner, in international projects. This business association can be a reliable and strategic partnership for developing and testing new products or innovative processes, exchanging experiences with other companies, associations, or technological centers, or supporting experimental research in the industry.

Full description

The Spanish association includes 25 companies from the canned sector. The companies are situated in the north of Spain and are dedicated to the production and commercialization of several products such as: anchovies, white tuna, mussels, little sardines, pudings and cakes of delicacies of the sea, cockles, or mackerels.

The objectives of the association are:

- The promotion, representation and defense of companies interests in the canned sector.
- increasing the economic performance of its members through cooperation.
- Supporting the internationalization of the companies that belong to the association,

- testing and developing new products and processes in the industry.
- promoting the food industry and trade in ecological, natural, and traditional products.

The business association is interested in participating in European projects. Some of the companies that belong to the organization have broad experience in innovation projects, especially in applying new procedures to the production processes and experimenting with new raw materials. Due to their knowledge of the sector, they can also be a reliable partner in projects related to blue economy, Agro-food industry, and circular economy etc.

Advantages and innovations

- All the companies respect the preservation of the fish and the ocean ensuring responsible, controlled, and sustainable fishing. Also, they respect the environment and natural resources during the production process, reducing their environmental impact.
- These companies maintain stable and close relationships with all their suppliers and local partners, so they can be a reliable partner in any project due to their connection with the environment and key stakeholders.
- Although all the companies have international experience, they still use the same artisanal techniques and respect fir traditions.
- The companies involved in the association have implemented circular economy practices throughout their production chains.
